Professional Experience

Frontend developer(Internship), *Brainnest*
05/2022 – 06/2022 | Bremen, Germany
Working with html css and JavaScript
A hands-on introduction to all the essential tools needed to create real, working websites. I understood what web developers actually do. The foundations I needed to get started on my web development career. How the web works and the basics of computer and web programming. This Internship helped me understand many of the elements involved in creating and serving content on the web. Languages like HTML, CSS, and JavaScript - the core tools every web developer needs to know to create stunning cascading websites (or just a really fancy online shopping list and also Engaging projects)
